◆ Colors shown are approximate values using ProPoxy and ProSpartic resins with a field dosage by volume of 8 oz per mixed gallon and up to 16 oz per mixed gallon with the following lighter colors: White, Ivory & Traffic Yellow. For a more accurate value when specifying a particular system, it may be necessary to request a physical sample from **ProREZ** to verify color choice before installing.

◆ Color matching and custom colors are available. For additional information, please contact a **ProREZ** technical representative or scan this code.
