

DecoStone LX™

Luxurious design... in a versatile, seamless coating system.

Smart, stylish, and hard-wearing, these richly defined polymer compositions offer a novel, contemporary look with enduring performance and measurable value.

SMART

Luxurious, sophisticated appeal

SPEEDY

Fast return to service

SIMPLE

Easy to install systems

DecoStone LX offers a unique, versatile, stylish design in a seamless, self-leveling, slurry system. It's a high-build flooring resurfacer providing industrial strength complemented with decorative sophistication and luxury appeal. This novel seamless flooring product is ideally suited for a broad range of commercial and institutional settings including:

- Education and Municipal Facilities
- Healthcare and Laboratories
- Retail and Boutiques
- Grocery and Markets
- Restaurant, Bars, and Cafeterias
- Veterinary and Animal Care

Hygienic and Safe

- Seamless, waterproof, non-porous, and microbial resistant
- Easy to clean, maintain, and sanitize
- Varying options for slip-resistance
- USDA, FDA, EPA, OSHA, and ADA compliant

Long-Term Protection and Performance

- Tenacious surface bonding and moisture vapor resistant
- Highly impact and abrasion resistant
- Unwavering color stability
- Chemical and stain resistant topcoats

DecoStone LX is a self-leveling slurry system composed of a pigmented epoxy primer, followed by a high-build, self-leveling slurry coat of proprietary colored fillers, and finished with a high-performance topcoat. The clear topcoat can be either gloss or satin, and finished with various non-slip media. Nominal thickness of 115-120 mils.

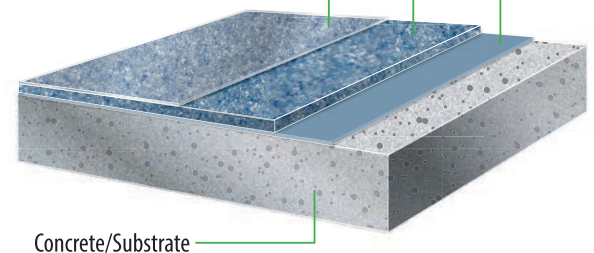

Installer Friendly

- Simple, self-leveling application
- 3-coat system for speedier return to service
- Easy and seamless repairs

1. ProPoxy S, F, MB-S, or MB-F pigmented epoxy primer

2. ProPoxy SL with DecoStone proprietary filler blend

3. ProThane or ProSpartic S or F, clear
