

LEED BUILDING COUNCIL

COMPLIANCE INFORMATION

Overview

ProREZ formulates polymer flooring materials that are free from phthalates and whenever possible products derived from water-borne technologies. Our packaging material is offered in optimized reusable or recyclable smart packaging solutions ProREZ, is committed to ensuring sustainable practices remain at the forefront of its Research & Development Manufacturing operations.

ProREZ continues to pursue innovation in formulation in order to keep up with the ever-increasing demand for green building materials and comply with USGBC Leadership in Energy & Environmental Design (LEED) building requirements.

LEED set out a series of energy and environmental design guidelines, which when followed, enable the building to operate at a lower expenditure, increase in asset value, conserve natural resources as well as minimize waste and emissions over the duration of its lifecycle.

Buildings that meet some, but preferably all, of the prerequisites outlined by LEED can qualify for certification that leads to tax rebates and other local incentives.

Advances in sustainable flooring technology mean that developers can specify materials that help the project attain credits towards certification in multiple categories.

Building Reuse (2 points)

MR Credit 1.1: Building Reuse: Maintain 75% of Existing Walls, Floors and Roof

MR Credit 1.2: Building Reuse: Maintain 95% of Existing Walls, Floors and Roof

Construction Materials Waste Management (2 points)

MR Credit 2.1: Construction Waste Management: Divert 50% From Disposal

MR Credit 2.2: Construction Waste Management: Divert 75% From Disposal

Recycled Content (1 point)

MR Credit 4.1: Recycled Content: 10% (post-consumer + ½ pre-consumer)

Regional Materials (2 points)

MR Credit 5.1: Regional Materials: 10% Extracted, Processed and Manufactured Regionally

MR Credit 5.2: Regional Materials: 20% Extracted, Processed and Manufactured Regionally

Rapidly Renewable Materials (1 point)

MR Credit 6: Rapidly Renewable Materials

Indoor Environmental Quality

Low Emitting Materials (1 point)

EQ Credit 4.2: Low Emitting Materials: Paints and Coatings
