

# MANUFACTURING

*Light/Medium/Heavy Duty*

*Clear, Solid & Decorative Systems*

Production or assembly areas, machine, workshop, mechanical room, loading dock, warehousing, distribution, cafeteria, locker, bathroom, or office floors — ProREZ™ will design and specify the right seamless floor coating solution for your space.

***The ProREZ™ Advantage... Innovation beneath your feet.***

*Imagine beneath your feet there's a dependable flooring solution that's highly durable, long lasting, and easy to maintain — a resilient coating or heavy-duty resurfacing system that stands up to punishing “wear and tear”, abrasion, chemical, load-bearing, and impact exposures — industrial-strength floors as tough and reliable as the people working on them. No matter the type of manufacturing your facility performs — a production or assembly line, machine shop, warehouse, or loading dock area, ProREZ offers a solid range of seamless, flooring systems and finishes to do the job.*

## **DIVERSE & DEPENDABLE SPACES**

In order to make the manufacturing facility more appealing to its personnel and visitors, it is important that the seamless floor coating is highly durable, provides a reliably safe surface, and is aesthetically pleasing and complementary to the overall design and atmosphere of the diverse spaces found in these types of settings. No one system does it all. ProREZ engineers, customizes, and specifies seamless floor coating, resurfacing, and integral cove base systems for a wide array of manufacturing and warehousing spaces that are long-lasting and simple to maintain — reducing maintenance, repairs, and overall life-cycle costs.

## **RECOMMENDED FLOORING SOLUTIONS**

### **PRODUCTION, RECEPTION, LAB AREAS**

Medium Duty Solid Color Systems (1/16"-1/8"): **ProShield SF-100B/200B**

| **ProCryl SF** | **ProShield SL** | **ProCryl SL** | **ProShield MR** | **ProCryl Flex**

Medium Duty Decorative Quartz Systems (1/16"-1/8"): **ProQuartz** | **ProCryl CQ**

Medium Duty Decorative Flake Systems (1/16"-1/8"): **ProFlake** | **ProCryl CF**

Medium Duty Decorative Metallic Systems (1/16"): **ProLumina**

### Hygienic and Safe

Facilities where dirt, oils, grease, chemicals, and other contamination can accumulate need to be hazard-free environments. ProREZ seamless, non-porous, waterproof, protective flooring finishes balance slip-resistance with ease-of-cleaning and degreasing, ensuring safety under foot for visitors and personnel, while meeting or exceeding local, state, and federal requirements.

### Low Odor, Fast Setting Materials

Busy manufacturing facilities cannot afford expensive downtime or hazardous odors. Maintaining indoor air quality with low-odor, zero VOC materials, and offering quicker installations and turn-around times for repairs, refurbishments, or new installations without extended disruptions to operation schedules are real ProREZ benefits.

### Long-Term Value in Protection and Performance

The value of the floor coating is ultimately derived from the relationship of its overall cost and maintenance to its long-term performance and durability. ProREZ engineers carefully assess each space considering its unique environmental, functional, aesthetic, and budgetary requirements.

### Customizable Finishes

ProREZ designs and specifies aesthetically pleasing, industrial strength flooring systems that are available in a wide selection of standard and custom colors, blends, patterns, and textures to distinctively complement any new or existing facility. Custom design accents including special borders, insignias and other useful floor markings can be integrated to enhance the overall image, safety, and productivity of your facility's space.
