- ◆ Colors shown are approximate values using ProThane WB Matte, with a field dosage by volume of 8 oz per mixed gallon and up to 16 oz per mixed gallon with the following lighter colors: White and Traffic Yellow. For a more accurate value when specifying a particular system, it may be necessary to request a physical sample from **ProREZ** to verify color choice before installing.

- ◆ Color matching and custom colors are available. For additional information, please contact a **ProREZ** technical representative or scan this code.
